BASKETBALL FOR LIFE SKILLS

Project Number: 613606-EPP-1-2019-1-CY-SPO-SCP

Basketball for Life Skills (BASKI)

Newsletter 2

In the online kick off meeting, which took place on March 2020, the project outputs were considered and following the preparation of data collection guidelines, a template for the final national reports as well as interview questions were shared with the consortium. The project website and logo were designed and were presented to all the partners from Cyprus, Bulgarian, Romania, Northern Macedonia, Greece and Italy. Further online meetings were held to plan the next steps. The activities were implemented, the national and transnational reports were created and the schedule of actions was discussed, including the development of training modules, usability tests, and tools for the online learning environment.

The training modules are designed to promote the following skills:

- 1) Communication
- 2) Teamwork
- 3) Problem Solving
- 4) Creativity
- 5) Leadership
- 6) Interpersonal Skills

The drafting of the modules was divided among the various project partners, who spent the next months researching and preparing the information needed to develop the training program.
