

## Basketball for Life Skills (BASKI)

The Multiplier Events for the BASKI partners were done successfully from April to June. More than 100 basketball coaches, sports educators, physical education students and sports decision-makers including professors and students from all over Europe in every Partner Country. All the partner's Multiplier Events presented their work with all Intellectual Outputs and in particular with the first one which they coordinated as well as dissemination activities and their Multiplier event. During the Final Conference in Cyprus, they enjoyed the joyous atmosphere of the outdoor basketball games in Limassol and informed the stakeholders of the project.

They are thankful to the project partners for their productive work and collaboration. In addition Basketball Federation of North Macedonia decided that Skopje, our capital city, would be the home base for our part of the project, for any activity and especially for the final multiplier event set to be held at the very end of the project. In the sports center Kale, which houses the national teams of Macedonia, we have gathered players, boys and girls, along with a dozen of coaches, to participate in the event. We have chosen the creativity module that focuses on a fast approach to the game, finding unique solutions and

inspiring those around you to do so. One of our head coaches for the youth teams demonstrated a couple of exercises that are key to mastering this part of the units in the project.

Furthermore, Limassol was the home for all partners on the first weekend of the month of June and also the last stop for the premiere of the BASKI project. All the partners got '15 minutes to present their activities so far and to sum up their experience in the past couple of years. Being part of the project has made us gain a new perspective on life after sports, and see it from another point of view.
